

risk	statement	response	objective	likelihood	impact	risk level
Procrastination	working for long periods of time can result in procrastination	take small breaks to improve concentration	increase the amount of time being productive	almost certain	insignificant	5
Strain injuries	working behind a desk for long periods can cause a number of strain injuries	take small breaks	improve comfort	likely	insignificant	4
Internet outage	There's always the possibility that internet issues may be encountered during the project	Try not to rely on online resources too much	reduce down time	possible	negligible	4
Computer breaks	A situation may occur where one of our PCs may break fatally	make regular commits so that progress isn't lost	decrease risk to project	rare	significant	5
Issues with code	We will probably run in to issues with the codebase that we do not fully understand	Find help either through training staff or online	Solve problems	likely	negligible	6
Monitor Stops Working	a situation may occur where one of our monitors may break, causing delays in completing the project	Will just have to buy a new one if this happens	decrease risk to project	rare	negligible	2
Running out of time	It's possible that we run out of time, which will mean that either the MVP or the testing will not be completed	Need to manage our time proactively	Make sure everything is completed in time	unlikely	significant	7
Git down for maintenance	There is the possibility that Git could go down during the timeline of this project.	Have local versions of the project.	Decrease downtime.	unlikely	extensive	6
Serious Illness	There is a chance that during the project one of us could become seriously ill.	Others will have to pickup work from whomever this may be.	decrease risk to project	rare	significant	5
Minor Illness	There is a chance that during the project one of us could become pick up a cold or the flu.	Whomever this may be will have to let the team know that they may be a bit slow/preoccupi ed.	Try to minimize impact to productivity.	unlikely	insignificant	2
Merge Conflicts	We will most likely encounter merge conflicts as this is a group project.	These will have to be sorted as and when they appear.	improve workflow	likely	insignificant	4
Power Outage	There is a chance that one of us may be affected by a power outage	Save and commit work regularly to minimize risk of lost progress.	decrease risk to project	rare	significant	5
Scope Creep	There is the possibility to get carried away and work on features which are not part of the spec	In daily stand ups we need to make sure that everyone stays on track	increase productivity	possible	negligible	4

	insignificant	negligible	moderate	extensive	significant
almost certain	5	7	8	9	10
likely	4	6	7	8	9
possible	3	4	6	7	8
unlikely	2	3	4	6	7
rare	1	2	3	4	5
